Painting Easter eggs in your city

How to activate the local community? Painting Easter eggs together is a great way to integrate residents and, at the same time, provide them with a marvelous attraction on the occasion of Easter.

Depending on the concept, such a project can be implemented in various ways. Some cities decide to deliver Easter eggs to various institutions in the municipality so that students or local artists can decorate them according to their own ideas. Another way to organize painting of Easter eggs in the city may be setting them on the main square or city promenade, where all residents will be able to take part in creating an Easter work of art.

Easter eggs decorated in this way will become a unique decoration of urban space, and with a bit of creativity, they can also become an element of urban games - as in Karpacz, for example!
